Subject Index

1/*f* noise 562
2DEG 146
4f electrons 428

Absorption 223
AlGaAs 419
AlGaN 397
$Al_xGa_{1-x}N$ 406
Anisotropic 244
Anisotropy parameters 256
Application of the nonlocal Fokker–Planck equation 302
Artificial atom 68

Ballistic electrons 187
Ballistic transport 285, 416
Bipolar transistor 263
Biprism effect 82
Birefrigence 451
Bloch oscillations 491
Bottleneck 476
Bragg structure 488
Breakdown 127
Buried metal technology 82

CaF_2 160
Carrier dynamics 36, 53
Carrier energy 554
Carrier heating 202
Carrier relaxation 8, 49, 107, 153, 434, 499
Carrier–carrier scattering 387, 535, 538
Chaos 209, 484
Charge carrier processes 568
Charge glass 64
Charged excitons 412
Circuit simulation 85
Coherence 82
Coherent control 353, 356, 360, 363, 371
Coherent LO phonon–plasmon coupled mode 367
Complex band structure 167
Conductance oscillation 88
Continuous operation 458
Control of dephasing 356
Corbino disc 274
Correlation functions 247
$CoSi_2$ 160
Coulomb blockade 78, 85, 522
Coulomb oscillation 78
Coupled quantum dots 53
Cubic phase GaN 256
Current 28
Current-density filament 274
Cyclotron resonance 183, 434

D'yakonov–Perel' 318
Dark states 476
Dark-pulse formation 394
Deformation potential 409
Diamagnetic shift 24
Dicke effect 341
Dielectric breakdown 532
Dielectric structures 491
Direct tunneling 550
Double quantum dot 31
Drivability 572
DX centers 241

Effective Hall factor 256
Electric field domain 205
Electrical breakdown 180
Electroluminescence 216, 219, 558
Electron beam lithography 136
Electron cooling 422
Electron devices 546
Electron distributions 416
Electron heating 157
Electron mobility 253
Electron states in low-dimensional structures 335
Electron temperature 143, 309
Electron transport in submicron structures 302
Electron–electron interaction 309
Electron–phonon interaction 299, 344, 402, 419
Elliott–Yafet 318
Emission 223
Energy exchange 535, 538
Energy gaps 49
Energy relaxation 378
Energy transfer 8
Energy transport 247
Erbium 428
Exchange coupling 328
Exciton cooling 409
Exciton dissociation 338
Exciton–exciton interaction 1
Excitons 324, 328, 363, 381, 412, 438, 472, 505, 509, 518

Far-infrared 216, 464
Far-infrared spectroscopy 183
Fast modulations 451
Femtosecond 472
Femtosecond pulse injection 394
Femtosecond pulse shaping 360
Femtosecond pump–probe spectroscopy 391
Femtosecond spectroscopy 96
FET 117
Filaments 270
Four-wave-mixing 234, 505
Fractional statistics 75
Franz–Keldysh effect 499
Free electron laser 431

GaAs 88, 123, 187, 244, 318
GaAs thin film 505
GaInP 250
GaN 253, 397, 402, 406, 409
$Ga_xIn_{1-x}P$ 428
Global coupling 270
Γ–X tunnelling 153
Green functions 167, 260
Gunn effect 288

H-band 146, 454
HEMT 331, 562
Heterostructures 267, 279
Heterovalent junction 78
High breakdown voltage 250
High drift velocity 250
High-field 344
High-field transport 348
High-speed optical techniques 394
Hole burning 384
Hole transfer 454
Hole transport process 198
Hopping conduction 213
Hot carriers 263, 402, 535, 538, 550
Hot electron effect 146
Hot electron emitter 425
Hot electron laser 480
Hot electron light emission 291
Hot electron spectroscopy 153
Hot electrons 82, 223, 241, 391, 451, 532, 542
Hot electrons and LO phonons in GaAs 442
Hot-carrier degradation 527
Hot-carrier noise 260
Hot-electron generation and relaxation 127
Hybrid 522
Hybrid structures 518
Hydrodynamics 260
Hydrogen/deuterium isotope effect 527
Hysteresis 270

II–VI multiple quantum wells 381
Impact ionization 241, 244, 253, 267, 291, 431, 558, 562
In-plane anisotropy 114
In-plane gate 123
InAs dot 24
InAs/AlGaSb 110, 149
InAs/GaAs 8
Indirect barrier 153
Inelastic tunneling 39
InGaAs 318, 391, 562
InGaAs/AlGaAs HEMT 558
Inhomogeneous broadening 384
Instabilities 267
Intersubband laser 226
Interface roughness 175, 565
Intersubband 438
Intersubband absorption 194
Intersubband scattering 107, 230
Intersubband transitions 234, 384, 451
Intervalley scattering 391
Intervalley transfer 139
Intraband resonance 5
Intrasubband transitions 223
I–V curves 64

Kinetic coefficients 75

Langevin forces 260
Laser excitation 554
Lifetime 428
Light propagation 491
Light-emitting diode 502
Line width 15
LO phonon emission 387
Localization 183
Localized states 49
Low-dimensional systems 75

Magneto-transport 190
Magnetoplasma 341
Magnetoresistance 72, 110
Magnetotransport 136
Many-body effects 12, 234
Maxwell–Bloch equations 341
Memory cell 85
Memory effects 313
Mesoscopic 282, 285
Mesoscopic grain 64
Mesoscopic physics 31
Metal/insulator heterostructure 160
Microcavity 467, 472
Microcavity polaritons 476
Microscopic photoluminescence 143
Miniband 183, 190
Mobility 572
Mode matching 167
Molecular dynamics 568
Momentum relaxation 338
Monte Carlo 219, 226, 244, 263, 279, 282, 285, 299
Monte Carlo calculations 247
Monte Carlo methods 230, 295, 568
Monte Carlo simulation 253, 431, 532, 542, 565
MOS 546
MOS reliability 542
MOSFET 45, 554, 572
MQW 101, 318
Multi-junction trap 92
Multi-photon absorption 464
Multiphoton–magnetophonon resonance 461

Nanomechanics 575
Nanostructures 133, 136
Narrow gap HEMT 114
Near-field enhancement 442
Near-field microscopy 96
Negative differential resistance 117
n–i–p–i-structures 499
Noise 263, 282, 285
Non-equilibrium carrier dynamics 348
Non-equilibrium Green's function method 306
Non-linear 61, 495
Non-linear phenomena 572
Non-linear transport in quantum dots 42
Non-Markovian relaxation 313
Non-orthogonality 28
Non-perturbative 438
Nonlinear absorption changes 499
Nonlinear optics 335
Nonlinear transport 213, 288
Nonthermal carrier distributions 387

Optical absorption 451
Optical line shape 15
Optical nonlinearities 288
Optical nutation 360
Optical properties 397
Optical switching 484
Optically detected cyclotron resonance 454

Particle collisions 568
Periodic potential 110
Phase breaking 72
Phase diagram 205
Phonon quantum beats 356
Phonon replica 24
Phonon-assisted tunnelling 171
Phonons 406
Phonons in double dots 42
Photocurrent 554
Photodiode 495
Photoluminescence 21, 36, 101, 146
Photon echo 313
Photon reabsorption and reemission 502
Photonics 484
Pixelless imaging device 502
Planar device 18
Plasmons 375
Polar optical phonon scattering 167
Polaritons 467, 488, 509
Population inversion 139, 458

QME 425
Quantized conductance 123
Quantum cascade laser 219

Quantum cascade structure 216
Quantum chaos 163, 209
Quantum coherence 363
Quantum computation 57
Quantum computing 45
Quantum dots 1, 5, 8, 12, 15, 21, 36, 45, 57, 61, 68, 72
Quantum Hall effect 127, 133
Quantum Hall effect breakdown 130
Quantum hydrodynamics 130
Quantum interference 353
Quantum kinetics 313, 356
Quantum transport 157, 448
Quantum transport equations 299
Quantum well infrared photodetector 502
Quantum wells 230, 234, 309, 324, 360
Quantum wire transistor 123
Quantum wires 96, 101, 107, 110, 117, 518
Quantum-well semiconductor diode lasers 394
Quasi-one-dimensional electron gas 143

Rabi oscillation 39
Radio frequencies 575
Raman scattering 419
Raman spectroscopy 406, 416
Random phase approximation 306
Ratchet 61
Real space transfer 117
Rectification 61
Relaxation 12
Relaxation rate 15
Relaxation time approximation 256
Resonant excitation 371
Resonant tunneling 18, 160, 163, 198
Resonant tunneling diode 167
Retention time 92

Saturation 464, 472
Scaling form 64
Scattering 282
Schottky wrap gate (WPG) 88
Schottky-barrier junctions 442
Secondary emission 371
Self-assembled quantum dot 18
Self-oscillation 205
Self-undulation 522
Semiclassical dynamics 209
Semiconductor heterostructures 163
Semiconductor lasers 495
Semiconductor optical amplifier 513
Semiconductor superlattices 209
SET 522
Shell structure 68
SHEM 425
Shot-noise 279
Simulations 219, 226, 546
Single-electron transistor (SET) 88
Single-electron tunneling 575
SiO_2 film 532
SOI-MOSFET 565
Solid state 82
Spatiotemporal dynamics 274
Spectrally resolved pump–probe measurement 367
Spin 324, 464
Spin precession 331
Spin quantum beats 328
Spin relaxation 318, 338
Spin splitting 149
Spin-density functional theory 68
Spin-polarized FETs 149
Spin–orbit coupling 331
Spontaneous emission 42, 363
Stark-ladder transition 198
Statistical treatment of carrier transport 302
Stimulated phonon decay 422
Strain 513
Strained superlattice 198
Stray capacitance 92
Superlattice 157, 175, 180, 183, 190, 194, 205, 213, 375, 448
Superradiance 341, 488
Symmetry-breaking 270

Terahertz 216, 375, 438, 458
Terahertz emission 375
Terahertz radiation 223, 461
Terahertz spectroscopy 434
Thermal conductance 75
Thermal conductivity 247
Thermalization 107
Thickness fluctuations 202
THz 226
THz electric field 448
THz spectroscopy 348
THz-electromagnetic wave 467
Tight binding 397, 513
Tight-binding method 167
Time resolved PL 412
Time-resolved 381
Time-resolved photoluminescence 12
Time-resolved photoreflectance 378
Transient photoluminescence 53
Transistor lifetime 527
Transport 175, 535, 538
Transport in superlattices 202
Triple barrier diode 171
Tunneling 28, 187, 194, 279, 378, 442
Tunneling current density 425
Tunneling spectroscopy 24
Tunnelling 21
Two-level atom systems 39
Two-level system 31

Ultra-short MOSFET 550
Ultrafast 495
Ultrafast absorption changes 384
Ultrafast processes 348
Ultrafast relaxation 344
Ultrafast spectroscopy 402

VCSEL 480
Vorticity 130

Wannier–Stark ladder 194
Wave function scarring 484
Weiss oscillation 136
Wide-band-gap materials 295
Wigner paths 299

Zener 180
Zero-field spin-splitting 114
ZnSe 338
